

Enbridge Northern Gateway Project

Respecting Tradition & Shaping the Future through Partnerships

OVERVIEW OF PROJECT

Enbridge Northern Gateway project proposes to construct and operate two pipelines carrying oil and condensate, 10 pump stations and a marine terminal. The pipe would be buried at a depth of one meter in a 25 meter right-of-way between Edmonton, Alberta and Kitimat, British Columbia. The proposed pipeline will travel through the southern area of Treaty 8 territory from the B.C., Alberta border south of Tumbler Ridge to Bear Lake along an existing right-of-way. The proposed pipeline is targeted for construction from mid to late 2012 and operation by 2015.

COMMUNITY ENGAGEMENT

Treaty 8 Tribal Association is undertaking an engagement strategy to provide communities up-to-date information on the Enbridge Northern Gateway project and gather feedback from the First Nations people. The project will identify current profiles, future needs and begin implementing programs. Participating communities include:

- Doig River First Nation • Prophet River First Nation • West Moberly First Nations •
Saulteau First Nations • Halfway River First Nation**

1. Communication Strategy

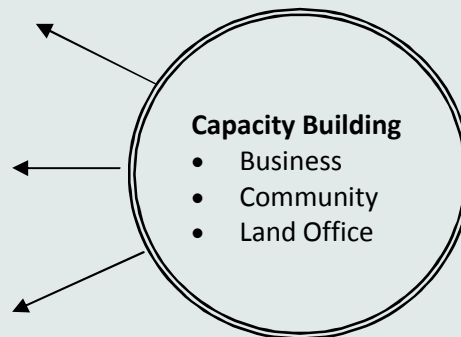

- Internal and external communication
- Partnerships

2. Social Economic Profile

- Business development and marketing
- Employment and training
- Equity, finance and large scale business

3. Traditional Use Studies and Data Collection

- Environmental concerns
- Environmental assessment and process
- Treaty and aboriginal rights impact assessment

Together we can protect and sustain the land and traditional knowledge through business partnerships.

Creating a successful future by becoming self-sufficient, focusing on positive outcomes and empowering people.
